CONSULTING SERVICES

GuardOps
SECURITY

GuardOps Security

GaurdOps Security helps you establish zero trust proactive security framework under which your organization stays secure and intrusion resistive 24x7.

We offer innovative cybersecurity services such as Vulnerability Assessment, Incident Response, Threat Detection, Security Audit & Compliance Certification, Security Awareness etc to help create you a safenet under which your organization can grow and prosper

Our Vision

We are driven to develop cutting-edge Cyber Security services and products that contribute to a safer future. Our goal is to innovate solutions that strengthen company assets while ensuring a completely secure environment without any friction in operations and business.

Why Work With GuardOps?

After spending years helping large organizations built resilient & efficient cyber security process and framework, we understand every client is unique and every infrastructure is fragile that needs regular upkeep. Our services are designed in such a way that makes them super easy to start with and super effective on ground level. We also custom design services as per client and business requirements. All during all this, we make sure 100% transparency and trust is built via established SOPs.

Why GuardOps is perfect for your organization ? :

Our Services

- ✓ Prevention of cyberattacks
- ✓ Protecting systems, networks, and data from threats
- ✓ Utilizes firewalls, encryption, and antivirus software
- ✓ Generally reactive, responding after an attack occurs

Cybersecurity

- ✓ Business continuity and recovery
- ✓ Ensuring operational continuity despite attacks
- ✓ Includes disaster recovery plans, data backups, and incident response
- ✓ Proactive, planning for recovery and adaptation to potential threats

Our Top Services

Vulnerability Assessment

We conduct thorough vulnerability assessments on your infrastructure, identifying and reporting on vulnerabilities with remediation steps. Over 90% of our clients see a significant reduction in security risks.

Incident Response

We help create and implement Incident Response (IR) plans, ensuring your teams are prepared for cyber attacks. Our 24x7 GuardOps service ensures continuous protection, reducing incident impact by 70%.

Threat Detection & SOC

We develop and execute Threat Detection (TD) plans, identifying security threats in your infrastructure. Our reports help mitigate risks, with a 95% detection accuracy rate. We assist in running SOC operations and designing SOC programs. Our SOC services enhance threat response times by 50%.

AI Security

Leverage AI against AI related threats. We make sure your resources are AI threat resilient. Guard your organization against AI threats such as Deepfake, Phishing attacks, AI threat vector etc

Our Top Services

Compliance and Audit

We prepare you for audits and help achieve compliance with standards like PCI, SOC 2, and ISO 27001. Our clients achieve a 100% success rate in certifications.

Penetration Testing

We perform penetration testing on your environment, providing insights to enhance security. Our tests reveal critical vulnerabilities in 85% of cases.

Identity and Access Management (IAM)

We design and implement IAM processes, ensuring secure access control. Our IAM solutions reduce unauthorized access incidents by 60%.

Security Talent Acquisition

We help you hire top security talent, ensuring your team is equipped to handle cyber threats. Our recruitment success rate is 90%.

Our Top Services

Cloud & Network Security

We offer comprehensive cloud & network security services, including Cloud Security Posture Management (CSPM). Our solutions reduce cloud security incidents by 75%.

Security Awareness Training

We conduct security awareness training for employees, addressing human error, the leading cause of breaches. Our training programs improve security awareness by 80%.

24x7 Support and Response

We provide round-the-clock support and response services, ensuring continuous protection. Our 24x7 services reduce downtime by 40%.

Data Security and Zero Trust

We implement data security measures and zero trust architectures, safeguarding your data. Our solutions enhance data protection by 70%.

Security Operations Center (SOC)

A circular diagram with a white center and a blue ring. The text "SOC Operations" is centered in the white area. A white arrow points downwards from the bottom of the circle.

SOC Operations

We assist in running your SOC operations and designing effective SOC programs. Our services enhance threat detection and response capabilities.

A circular diagram with a white center and a blue ring. The text "Mitigation and Recovery" is centered in the white area. A white arrow points downwards from the bottom of the circle.

Mitigation and Recovery

Our SOC services improve threat response times by 50%, ensuring timely mitigation of security incidents. And recovery from cyber attacks.

Monitoring & Response

We offer 24x7 monitoring, incident analysis, and threat intelligence services. Our team works closely with you to design and implement a SOC program tailored to your needs.

Vulnerability Assessment

Our comprehensive vulnerability assessment service identifies and evaluates security weaknesses in your infrastructure. We provide an in-depth report detailing vulnerabilities and actionable remediation steps. Over 90% of our clients experience a significant reduction in security risks. Our assessments help prioritize vulnerabilities based on risk, ensuring efficient resource allocation.

Advanced tools and methodologies ensure thorough coverage of your infrastructure.

In-depth reports highlight vulnerabilities and provide actionable remediation steps.

Regular assessments help maintain a strong security posture over time.

Expert analysts manually verify findings to ensure accuracy.

Incident Response

We help you develop and implement a robust Incident Response (IR) plan, ensuring your teams are prepared for cyber attacks. Our GuardOps service offers 24x7 incident response, keeping you secure around the clock. Our IR plans reduce incident impact by 70%, minimizing downtime and data loss. Continuous monitoring and rapid response ensure threats are neutralized swiftly.

Immediate action to contain and mitigate security incidents.

Tailored incident response plans to suit your organization's needs.

Detailed reports and recommendations for improving future response efforts.

Regular training sessions and simulated drills to keep your team prepared.

Advanced tools identify threats as they occur, enabling swift action.

Continuous monitoring and response to ensure round-the-clock protection.

We conduct a thorough assessment of your current IR capabilities, design a tailored IR plan, and provide training to your teams. Our GuardOps service includes real-time threat detection and response.

Threat Detection

Overview

Our threat detection service helps you identify and mitigate security threats within your infrastructure. We provide detailed reports on detected threats and recommendations for mitigation. With a 95% detection accuracy rate, our service ensures early identification of potential threats, reducing the risk of breaches. We deploy advanced threat detection tools and techniques, continuously monitoring your systems for suspicious activity. Our experts analyze the data and provide actionable insights.

How We Help

Automated Alerts: We Set up automated alerts for suspicious activities, ensuring prompt response.

Continuous Monitoring: We 24x7 monitoring of network traffic and system logs to detect anomalies.

Incident Analysis: We Detailed analysis of detected threats to understand their nature and impact.

Regular Updates: We Continuous updates to detection rules and signatures to adapt to evolving threats.

Reporting and Remediation: We Comprehensive reports on detected threats with recommendations for remediation.

Automating threat detection processes

Advanced SIEM Tools: We utilize Security Information and Event Management (SIEM) systems like Splunk and IBM QRadar for real-time threat detection and analysis.

Behavioral Analytics: We Implement User and Entity Behavior Analytics (UEBA) to identify unusual patterns and potential threats.

Threat Intelligence Feeds: We Integrate with threat intelligence platforms such as ThreatConnect and Recorded Future to stay updated on emerging threats.

Detection Automation: We help you automated threat detection, helping you find threats on the go.

Penetration Testing

Our penetration testing service simulates real-world attacks to identify vulnerabilities in your environment. We provide detailed insights and recommendations to enhance your security. Our tests reveal critical vulnerabilities in 85% of cases, helping you address potential threats before they can be exploited.

1

Identify vulnerabilities in web applications with tools like Burp Suite and OWASP ZAP.

2

Simulate phishing and other social engineering attacks to test employee awareness.

3

Ensure adherence to standards like PCI-DSS, HIPAA, and ISO 27001.

We perform both automated and manual testing, covering network, application, and physical security. Our experts analyze the results and provide a comprehensive report with remediation steps.

Compliance & Audit Certifications

1

Helping you get and stay compliant

We prepare you for audits and help achieve compliance with industry standards such as PCI, SOC 2, and ISO 27001. Our services ensure you meet regulatory requirements and maintain a strong security posture. Our clients achieve a 100% success rate in certifications, enhancing their credibility and trustworthiness.

2

How do we help ?

We conduct a thorough compliance assessment, identify gaps, and provide guidance on remediation. Our team supports you throughout the audit process, ensuring successful certification.

Identity and Access Management (IAM)

We design and implement IAM processes, ensuring secure access control and protecting your sensitive data. Our solutions help manage user identities and permissions effectively. Our IAM solutions reduce unauthorized access incidents by 60%, enhancing overall security. We assess your current IAM practices, design a tailored IAM framework, and implement the necessary tools and technologies. Our team provides ongoing support and maintenance.

We conduct a thorough assessment of your current IR capabilities, design a tailored IR plan, and provide training to your teams. Our GuardOps service includes real-time threat detection and response.

Automate user account creation, modification, and deletion using tools like Microsoft Azure AD and Okta.

Implement role-based access control (RBAC) and least privilege principles to ensure secure access.

Enhance security with MFA solutions such as Google Authenticator and Duo Security.

Cloud & Network Security

Safeguarding sensitive data in the cloud

1

We offer comprehensive cloud security services, including Cloud Security Posture Management (CSPM). Our solutions protect your cloud infrastructure and data. Our cloud security services reduce security incidents by 75%, ensuring your cloud environment remains secure. We also offer network security services, including firewall management and intrusion detection. Our solutions protect your network from external and internal threats.

Protecting cloud environments from external threats

2

We assess your cloud security posture, identify vulnerabilities, and implement security controls. Our team provides continuous monitoring and support to maintain a secure cloud environment.

Google

Microsoft

SECURE

Data Encryption:

Encrypt sensitive data both at rest and in transit to prevent unauthorized access. Enforce strict access controls, ensuring only authorized users can access critical data.

Zero Trust Architecture

Implement a zero trust model, verifying every access request to ensure robust security. Use advanced tools like CrowdStrike and Symantec to secure endpoints against malware and other threats.

Continuous Monitoring

Monitor endpoints and data activities in real-time to detect and respond to threats promptly. Provide rapid response to security incidents, minimizing impact and ensuring quick recovery.

Endpoint & Data Security With Zero Trust

We implement data security measures and zero trust architectures, safeguarding your data from unauthorized access and breaches. Our solutions ensure robust data protection. Our data security solutions enhance data protection by 70%, reducing the risk of data breaches. We assess your current data security practices, design a zero trust framework, and implement necessary controls. Our team provides ongoing monitoring and support. We also provide endpoint security solutions, protecting devices from threats such as malware and ransomware. Our services ensure your endpoints remain secure.

24x7 Support & Oncall

We provide round-the-clock support and response services, ensuring continuous protection for your organization. Our team is always available to address security incidents and provide assistance. Our 24x7 services reduce downtime by 40%, ensuring your operations remain uninterrupted. We offer real-time monitoring, incident response, and technical support. Our team works closely with you to resolve issues promptly and effectively.

Continuous monitoring of your systems to detect and respond to threats in real-time.

Tailored support plans to meet your specific needs and requirements.

Access to a team of cybersecurity experts available at any time.

Regular reviews and updates to enhance support effectiveness.

Pricing

Contract Jobs

We assist in running your SOC operations and designing effective SOC programs. Our services enhance threat detection and response capabilities.

Hourly Assignments

Our SOC services improve threat response times by 50%, ensuring timely mitigation of security incidents. And recovery from cyber attacks.

Annual Contracts

We offer 24x7 monitoring, incident analysis, and threat intelligence services. Our team works closely with you to design and implement a SOC program tailored to your needs.

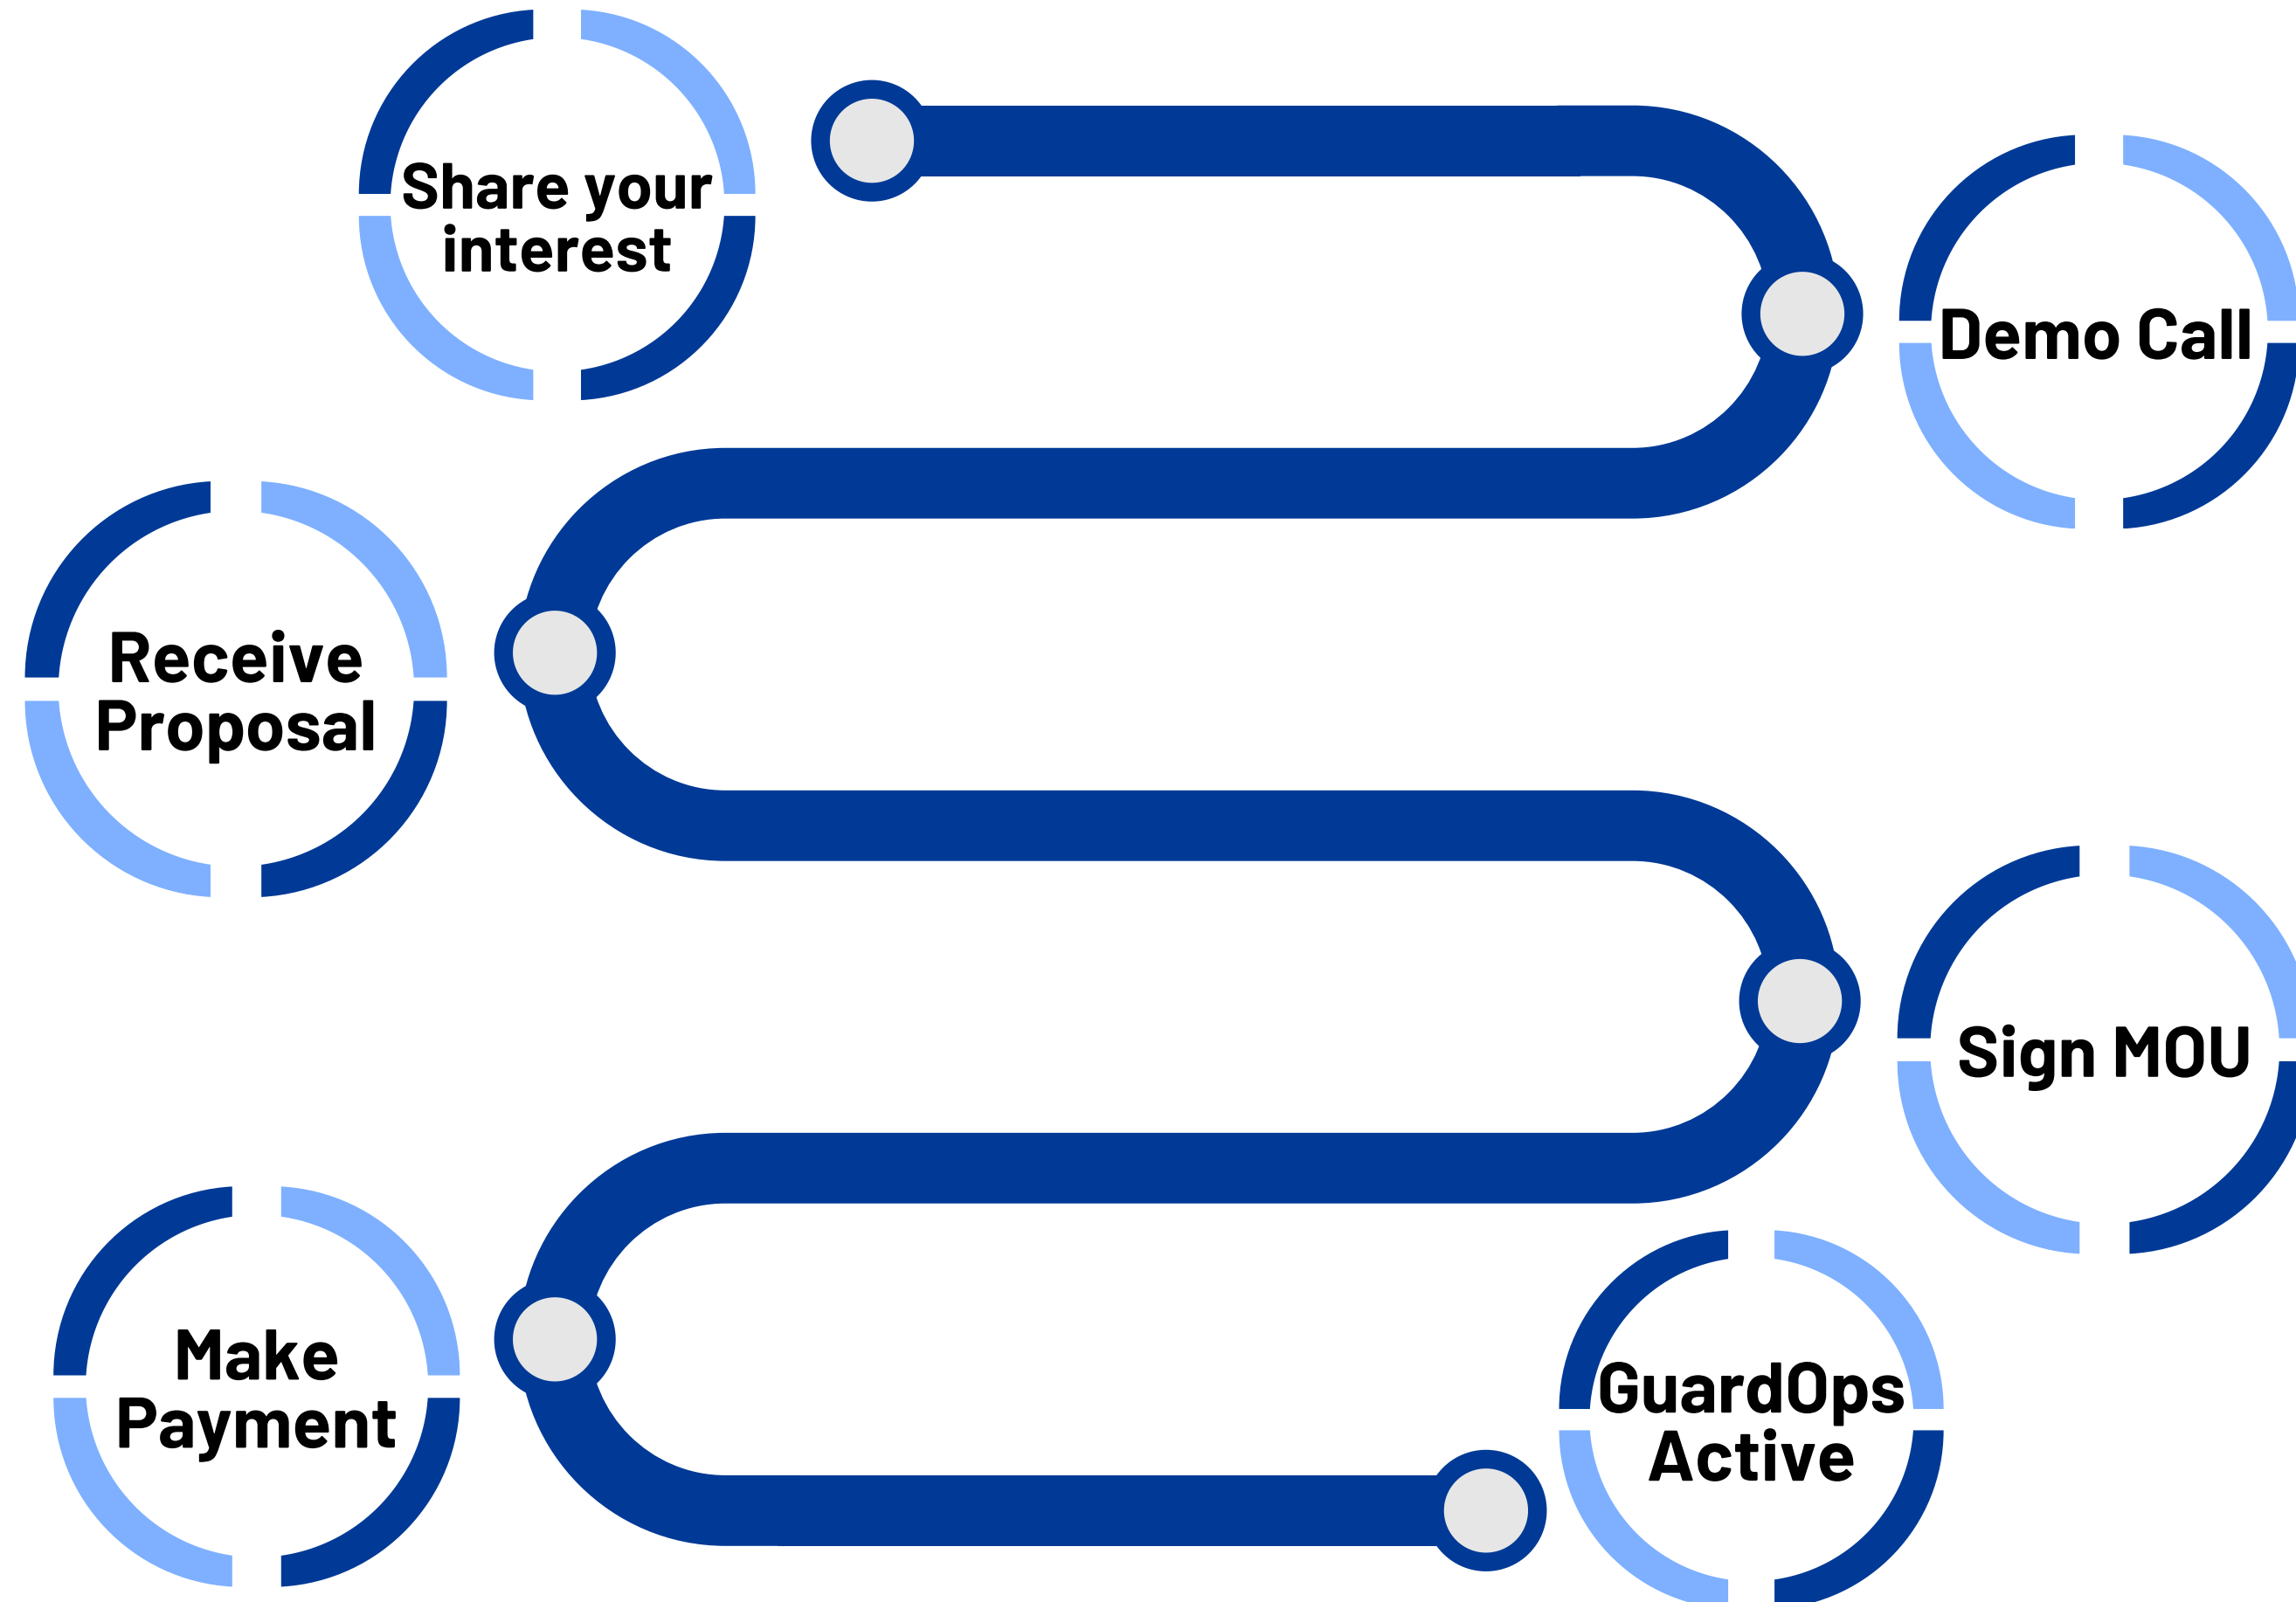

Per Project

Make payments based on per project basis, making transactions easier and more transparent. Share us your requirements and we'll get back with our quotes.

Customized

We can create customized payment plans for your needs. Reach out to us for a personalized payment plan.

How To Start With GuardOps

Conclusion

our cybersecurity consultancy stands out from the competition through our innovative use of AI and cutting-edge technologies. We offer a comprehensive suite of services, including vulnerability assessments, incident response, threat detection, and more, all designed to provide robust protection for your organization.

Our AI-driven solutions enable us to detect and respond to threats in real-time, ensuring your security posture remains strong and adaptive to emerging risks. By leveraging advanced tools and methodologies, we deliver unparalleled accuracy and efficiency in our services. Partner with us to experience the difference that AI-powered cybersecurity can make in safeguarding your business.
